@OdeToCode - <http://OdeToCode.com>

Summary

```
public string Message { get; set; }
public IEnumerable<Restaurant> Restaurants { get; set; }

public ListModel(IConfiguration config,
                  IRestaurantData restaurantData)
{
    this.config = config;
    this.restaurantData = restaurantData;
}

public void OnGet()
{
    Message = config["Message"];
    Restaurants = restaurantData.GetAll();
}
```
